

Cerumen Impaction is **NOT** a **SMALL** Problem.

Approximately

12 Million

Seek care annually for problematic cerumen.

Nearly

8 Million

Cerumen removal procedures are performed annually.

Cerumen impaction affects approximately...

 **10%** of children

 **5%** of healthy adults

 **57%** of older patients in nursing homes

Millions of Patients. One Common Challenge.

Visualize

Assess

Remove

Cerumen impaction patients of all ages and drives **millions** of healthcare visits each year.

Effective management begins with **clear visualization** of the ear canal and selecting the **appropriate removal method** on the patient's presentation.

One Problem. A Solution.

Clear Visualization Leads to
Better Cerumen Management

ClearLook® Lighted Ear Cures™ combine illumination and curettage in a single instrument to support visualization and cerumen removal.

When irrigation is clinically appropriate, **OtoClear® AquaBot® Ear Irrigation System** provides a purpose-built irrigation option.
