

Prevent backsplash of blood pathogens during high-volume irrigation of non-complex wounds

MADE IN THE USA

Igloo® Wound Irrigation Shield

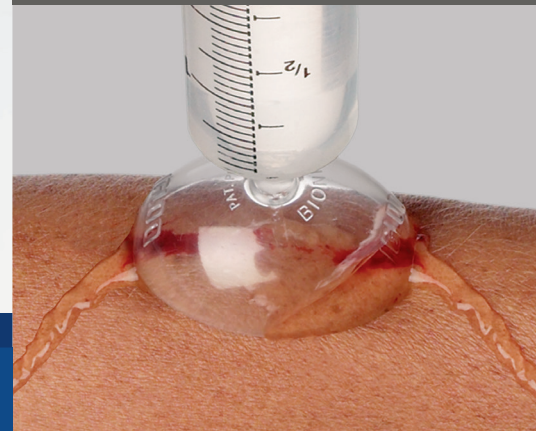

Single-use, sterile shields for wound irrigation

PRODUCT OFFERING

#5250 – 25 Igloo Wound Irrigation Shields (sterile)

#5500 – 50 Igloo Wound Irrigation Shields (sterile)

FEATURES

- Designed for use during the general cleaning of wound sites
- Dual exit portals safely direct effluent removal away from the wound without backsplash
- Each single-use shield is sterile and individually wrapped in an easy-to-open pouch
- Standard luer slip connection
- Can be used on all ages

BENEFITS

- Protects the user from backsplash and contamination
- Promotes healing
- Reduces risk for cross-contamination
- Transparent material allows wound visualization during use

Bionix® Igloo Wound Irrigation helps protect healthcare staff by preventing backsplash of blood pathogens during high-volume irrigation of non-complex wounds.

Refer to the package insert supplied with product for specific information on indications for use, contraindications, warnings, and precautions.
