

Lighted Forceps for Foreign Body Removal

**Clearer visibility. Greater control.
Confident extraction.**

Foreign body removal in the ear canal or nasal passage requires clear visibility and steady grasping. Bionix® Lighted Forceps combine bright illumination, magnification and precise grasping to support efficient, controlled in-office procedures.

Why Clinicians Choose Bionix Lighted Forceps

- **Clear visualization to support clinician technique**
Integrated illumination and magnification help clinicians see the anatomy and the foreign bodies clearly, supporting accurate placement and controlled movement.
- **Designed to grasp a variety of materials**
Soft, flexible or irregularly shaped objects can be challenging to handle. Lighted Forceps combine visibility with grasping ability to support foreign body removal.
- **Supports efficient routine procedures**
Improved visualization supports confident technique and a smooth in-office experience for patients of all ages.
- **Intuitive and easy to use**
Designed to feel familiar in the hand, fitting naturally into existing workflows with minimal training.
- **Practical for everyday clinical use**
A simple, disposable option for clinicians who frequently manage ear or nasal foreign bodies in general medicine, pediatrics and urgent care.
- **A smart investment**
Single-use forceps support infection control. Compatibility with the Original Light Source and the Rechargeable Light Source supports value across Bionix lighted instruments.
