

Lighted Suction

for Cerumen and Foreign Body Removal

Precision illumination and control for confident cerumen and foreign body removal.

The Bionix® Lighted Suction Handle combines bright illumination and integrated magnification for safer, more efficient ear and nasal procedures. Designed for clarity and control, it helps clinicians see more, do more and work confidently.

Designed for Clarity and Control

- **Targeted Illumination** – Bright, focused light enhances visibility deep within the ear canal, reducing guesswork during suctioning. Compatible with Bionix Original and Rechargeable Light Sources.
- **Integrated Magnification** – Improves clarity and precision by enlarging the field of view, helping clinicians work more efficiently and without switching between tools.
- **Single-Use Handle** – Prevents cross-contamination and eliminates the need for reprocessing between patients.
- **Easy Connection** – Attaches to standard suction tubing for seamless use.
