OneLight™

Lighted MicroSuction System

Precision illumination.
Quiet operation. Confident care.

Why Clinicians Choose Bionix®

A better system to remove cerumen and foreign bodies

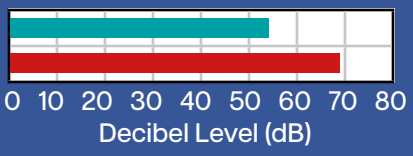

More than a tool, it's a smarter system built to support procedural clarity, patient comfort and clinical efficiency.

1. **Designed for safer, more precise procedures**
   Integrated light and magnification give clinicians a clear view of the ear or nasal passage, improving visibility, supporting accuracy and reducing the chance of complications.
2. **Enhanced patient comfort**
   The hospital-grade suction pump, developed by a pediatric ENT, operates at 54 dB and offers three levels of effective suction so you can match the power to the procedure.
3. **Compact and easy to use pump**
   The cordless pump is rechargeable, portable and lightweight. Its small footprint makes it ideal for use in all patient care settings.
4. **A smart investment**
   A complete system that supports clinical performance and adds value through streamlined efficiency.
5. **Versatile for ear and nasal procedures**
   Supports both cerumen removal and foreign body extraction.

HOW TO USE VIDEO

Why Quiet Matters

Noise levels impact both patients and providers.

54 dB = Bionix MicroSuction System Pump – equivalent to a soft conversation

69 dB = standard ENT vacuum pump

A 15 dB reduction makes the procedure more comfortable for patients and less stressful for your team.

bionix® | Innovation With Impact

OneLight™

Lighted MicroSuction System

The Bionix® Lighted MicroSuction System
Combining bright illumination, magnification and effective suction in one compact, cordless solution.

Designed to improve visibility and streamline procedures, this complete system supports confident removal of cerumen and foreign bodies while enhancing the overall clinical experience.

Product Offering:

#2650 – Lighted MicroSuction System
- (1) Rechargeable, Hospital-grade Suction Pump
- (10) Lighted Suction Handles
- (1) OneLight™ Rechargeable Light Source
- (1) Magnification Lens
- (1) Flexible Suction Tubing (39.4")
- (1) Cerumen Catcher
- (2) Charging Cables
- (2) Charging Blocks

#2651 – (25) Lighted Suction Handle Refill Pack
#2652 – (1) Replacement Cerumen Catcher
#2653 – (1) Replacement Suction Tubing
#3600 – (1) OneLight Rechargeable Light Source with (1) Magnification Lens

Backed by Bionix
With more than 40 years as the leader of ear, nose and throat innovation, Bionix is trusted by clinicians across the continuum of care. The Lighted MicroSuction System delivers the visibility, precision and patient-focused design that providers value most.

Cerumen or Foreign Body CPT Codes:
69210 – Removal impacted cerumen (separate procedure), 1 or both ears.
69200 – Removal foreign body from external auditory canal; without general anesthesia.
30300 – Removal foreign body, intranasal; office type procedure.
