

The Ecosystem for Procedural Readiness.

Ready When the Patient Needs You.

Procedural readiness means your team is ready when the patient needs them to be, and stays that way.

The OneLight™ Ecosystem brings tools, organization and guidance together to support readiness for in-office ear, nose and throat procedures.

See and treat: One Rechargeable Light Source powers a growing range of compatible illuminated tools, bringing illumination to the area where you're working.

Prepare for the procedure: ReadyHub™ gives compatible tools and accessories a defined home, with preparation guidance to help teams gather and stage products.

Build procedural confidence: Clinical education supports your team's knowledge of OneLight products and their use.

Close the loop: Coding guidance provides a reference to support billing after the procedure.

Is Your Team Procedurally Ready? Take a quiz to identify opportunities in your practice.

Innovation With Impact

OneLight™ ReadyHub™

OneLight™ ReadyHub™ gives your tools and accessories a defined home, helping ensure the appropriate products are ready when needed. Prep for the procedure. Carry to the point of care. Return everything to its place.
